## DETAILED ACTION

### *Specification*

1. Claim 21 is objected to because of the following informalities: Claim can't depend on itself. Appropriate correction is required.
2. The following rejections are based on the best understanding of the claimed limitations.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1,27,28 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Fineblum (U.S. Patent Number 4,918,937).

Fineblum discloses an air conditioning system with an engine-driven compressor circuit and a thermal compression circuit. Referring to Fig. 1, a refrigerant pump 22 and a heat exchanger vapor generator 24 generate high-pressure refrigerant vapor which drives the thermal compressor 10. The system comprises a compressor 10, a connected pulley 30, a magnetic clutch 32, a condenser 12, a receiver-dryer 14, expansion valve 16, evaporator 18 and a suction valve 20. The heat exchanger 24 is located downstream of the liquid pump 24 and the heat exchangers 12,18 are coupled to the compressor 10. Refrigerant pump 22 can be either AC or clutch driven.

***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-35 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-24 of U.S. Patent No. 6,418,745. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim a pump pressuring liquid to a first pressure, a heat exchanger acts as a heat powered refrigerant compressor capable of receiving and transferring external heat to vaporize liquid refrigerant, compressor, condenser and evaporator.
